THE COMPANY(Introduction)

Creative and contemporary

TeKnoFirm Inc., shortly **TeKnoFirm**, was incorporated in the state of Virginia, USA in 1999. Company provides professional services in IT related area. It is a *Minority Owned company, DBE/MBE, SWaM certified in VA.*

We render software solutions in relational databases, Telecommunications, Satellite communications, Mortgage industry. We have an enhanced capability to increase into any market, which is related to Information technology.

Currently, **We** are engaged in the activity of providing talented manpower resources in the specific areas like RDBMS, ERP solutions, Telecommunication Software, System level programming, System administration.

We take offshore as well as on site support projects for the client's requests. The development can be taken on per project basis or module basis depending on the depths of the specifications & manpower involved.

We choose our software professionals on the basis of individual talent, expertise, experience in the specific area & most importantly attitude which is highly scrutinized.

We have a very good contacts in the Countries like India, Taiwan & Australia, which are opposite to the USA on the globe where the time difference is nearly half a day, which can be used effectively in developing crucial projects via WAN.

Most importantly, **We** value "Customer Relation" & promise to keep that as our #1 priority.

More info can be achieved by calling us at our office & letting us allow serving you.

What TeKnoFirm offers

- IT solutions- development, Testing, QA
- Onsite consulting
- Developing Multi - Media Solutions
- Designing and hosting Web Pages
- Services for Support and Maintenance of Third party application software
- Offshore Development for low budgeted projects

THE EXPERTISE

SOFTWARE DEVELOPMENT, PLACEMENT, CONSULTING

We render our services in Consulting where we provide the best of the talent in of the industry for short duration of a time to client. If client is asking for Placement services, we render that too with a very nominal fee though our main business & focus is not the placement.

We take Software development projects ON-shore (to be developed at the client site or to be developed at TeKnoFirm's office) or OFF-shore preferably to India where we have our OFF-shore office. This gives multi advantages to our clients such as

- Cost effectiveness
Use of the best labor at a very low cost
- Effective time zones
Use nearly 12-hour time zone difference, to support any 24 hours support
- Tedious jobs completion
Many labor-oriented jobs like massive data entry, documentation, and conversions can be down loaded to OFF-shore office where time is sometimes not crucial.

Expertise include

Database Management, Data Architecture, Database development, Backup, Restore, Replication, Upgrades, Network Issues, Hardware architecture (specialized in Unix based systems, Solaris etc), 24 * 7 helpdesk support.

Application Expertise

Mortgage, Banking, Risk Management, Satellite communication, Microwave communication, Government Business (DoE), Modernization expertise For US Census Bureau (Statistical Analysis)

Development v/s cost

- ON-shore development
- OFF-shore development
- Massive data entry
- Tedious documentation
- Conversions
- Time zone difference advantage
